

[illegible]

The diagram shows the wiring for the left limit switch. The microcontroller pin **LIMIT_LEFT (oct_left)-GPIO5** is connected to the anode (pin 4) of the **PC817C (DIP-4)** optocoupler through a **4.7kΩ** resistor (**R9**). The cathode (pin 3) of the optocoupler is connected to **GND**. The LED pins (1 and 2) are connected to a **+5V** supply through an **820Ω** resistor (**R10**). The phototransistor pins (pin 1 to VCC and pin 2 to GND) are connected in parallel with the LED pins. The microcontroller pin **LIMIT_RIGHT (oct_right)-GPIO3** is also connected to the anode (pin 4) of the optocoupler through a **4.7kΩ** resistor (**R6**).
